

Name: Priscilla Paulio + Oakdale School, Dedham, MA

A germ is a thing that

can travel around the world.

It ^{can} travel around the world

by going hand to hand.

A germ can get in your

mouth by your hand touching
your mouth. Or a germ can
get in your nose too. A germ
can also get in cuts. I
can find a germ by looking
through a microscope.
But at ever is good for
your body

a fever effect the germs.
